PROFILE

Senior Software Engineer with over a decade of experience designing and developing robust, scalable solutions. Collaborates with multidisciplinary teams to deliver business goals, with a focus on process optimization and the impact of software on digital transformation.

WORK EXPERIENCE

12/2024 – 02/2026 | Senior Backend Software Engineer | Falabella

- Developed and optimized critical microservices for the pre-sales team.
- Utilized Node.js, Go, and Java 1.8 to build scalable backend solutions.
- Applied CI/CD practices and utilized Datadog for monitoring and performance optimization.

06/2022 – 12/2024 | Senior Software Engineer | Sodimac (Retail Digital Corp.)

- Key member of the corporate personalization team, directing development for five Latin American countries.
- Engineered frontend libraries and modules using JavaScript and Dynamic Yield.
- Conducted A/B testing to monitor project lifecycles and implement continuous improvements.
- Coordinated with multidisciplinary teams to ensure high-quality project delivery.

10/2020 – 06/2022 | Full Stack Developer | Transparentia S.A.

- Specialized in PHP development using the Yii2 framework.
- Managed and optimized MS SQL and MySQL database structures.
- Implemented custom solutions and critical system enhancements to meet organizational requirements.

05/2012 – 07/2020 | Development Engineer | CETIUC

- Served as the primary lead for all platforms and services offered by CETIUC.
- Developed and maintained systems using PHP, MySQL, jQuery, and Symfony.
- Utilized version control (Git) and created data visualizations using Highcharts and Protovis.

03/2018 – 07/2018 | Instructor | IPG Panguipulli campus

- Taught evening classes, delivering subjects: Basic Computing, Computing I, and Computational Applications Workshop.
