PROFESSIONAL SUMMARY

Full-stack software engineer with 14+ years of experience designing, building, and maintaining production software across retail, e-commerce, and backend platforms. Comfortable across the whole stack, from PHP/Symfony legacy systems to modern Node.js/Go/Java microservices on GCP with Kubernetes, and quick to ramp on new codebases, tools, and teams. Led personalization development for five Latin American countries and improved critical microservices for one of the region's largest retailers.

CORE COMPETENCIES

Full-Stack Development (PHP/Symfony to Node.js/Go/Java)

Distributed Systems & Microservices on GCP

High-Volume Production Systems (5 LATAM countries)

Cloud-Native: Kubernetes, Docker, Pub/Sub, Cloud Run

PostgreSQL, MySQL, MS SQL - Advanced

JavaScript (React, Angular, jQuery) & TypeScript

CI/CD, Datadog Observability, GitOps

Cloud Migrations (GCP to Azure)

WORK EXPERIENCE

Falabella (FTC) Dec 2024 - Feb 2026

Senior Backend Engineer

Remote

- Built and operated critical microservices using Node.js, Go, and Java on GCP (Pub/Sub, Cloud Run, Kubernetes)
- Designed and maintained high-throughput message processing with retries, idempotency keys, exponential backoff, and dead-letter handling for personalization events across 5 LATAM countries
- Implemented rate limiting and backpressure controls on Pub/Sub consumers to protect downstream services during traffic spikes
- Operated PostgreSQL at scale with connection pooling, read replicas, and query optimization for sub-100ms p99 latency
- Built observability dashboards and alerts in Datadog (metrics, traces, logs) for 50+ microservices; on-call rotation for critical path services

Sodimac / Retail Digital Corp Jun 2022 - Dec 2024

Senior Software Engineer

Remote

- Led personalization platform serving 5 LATAM countries; engineered A/B testing infrastructure with statistically rigorous experiment assignment and result tracking
- Built frontend libraries and modules in JavaScript/Dynamic Yield integrated with backend recommendation APIs
- Collaborated across engineering, product, and data science to deliver personalization features driving measurable revenue uplift

Transparentia SpA Oct 2020 - Jun 2022

Full Stack Developer

Remote

- Full-stack development with PHP (Yii2), MS SQL, and MySQL for critical organizational systems
- Executed full infrastructure migration from GCP to Azure (VMs, databases, networking, CI/CD pipelines)
- Maintained legacy systems while delivering new features; zero-downtime migration for production workloads

CETIUC May 2012 - Jul 2020

Development Engineer

Temuco, Chile

- Sole engineer responsible for all platforms and services (PHP, MySQL, Symfony, jQuery, Highcharts, AWS/ECS)

- Built and maintained voting platform for CIO/CPO clubs; managed infrastructure including domains, SVN, Apache servers
- Designed and optimized SQL schemas and queries for reporting dashboards serving executive leadership

IPG Panguipulli Campus

Mar 2018 - Jul 2018

Instructor

Panguipulli, Chile

- Taught evening classes: Basic Computing, Computing I, and a Computer Applications Workshop

INGELOG

Jun 2011 - Nov 2011

IT Technician

Temuco, Chile

- Development and maintenance of systems and databases for Indigenous Development Projects in Temuco (bridge and road requests by indigenous communities)

PROJECTS

Pokengular [Open Source](#)

Angular experiment fusing two Pokémon names and generating AI images of hybrid creatures.

Angular, Pollinations.ai (Flux), BYOP flow

GameDeals - ITAD [Open Source](#)

Angular app listing temporarily 100%-discounted games via IsThereAnyDeal API.

Angular (standalone components, signals, RxJS), IsThereAnyDeal API

SetlistApp [Open Source](#)

Musical setlist manager with drag-and-drop, duration lookup, and optional Google Drive sync.

Angular, iTunes Search API, Google Drive API

EDUCATION

Civil Engineering in Computer Science INACAP (Temuco)	2011
Computer Science Engineering INACAP (Temuco)	2010
Programmer Analyst INACAP (Temuco)	2008

CERTIFICATIONS

TOEIC (930)	ETS	2017
EF SET English - C2 Proficient	EF Education First	2024
Google Cloud - Monitor and Log with Cloud Operations Suite	Google Cloud (Credly)	2023
Docker	Docker Inc.	2023
Kubernetes	LinkedIn Learning	2023
React Foundations for Next.js	Vercel/Next.js	2023

SKILLS

Languages: JavaScript, Go, Java, PHP, SQL (MySQL, MS SQL, PostgreSQL), HTML, CSS

Frontend: React, Angular, jQuery, Dynamic Yield, Material UI, Bootstrap, Highcharts, Protovis

Backend & Cloud: Node.js, Symfony, Yii2, GCP, AWS, Kubernetes, Docker, CI/CD, Datadog, Pub/Sub, Cloud Run

Tools: Git, Linux/Apache Servers, SVN
