## PROFESSIONAL SUMMARY

Full-stack software engineer with a Civil Engineering in Computer Science background and 14+ years of experience designing, building, and maintaining production software systems across retail, e-commerce, and backend platforms. Comfortable across the whole stack, from PHP/Symfony legacy systems to modern Node.js/Go/Java microservices on GCP with Kubernetes. Led personalization development for five Latin American countries at one of the region's largest retailers and executed a full cloud infrastructure migration with zero downtime. Quick to ramp on new codebases, tools, and teams.

## CORE COMPETENCIES

Full-Stack Development (PHP/Symfony to Node.js/Go/Java)

Distributed Systems & Microservices on GCP

High-Throughput Production Systems (5 LATAM Countries)

Cloud-Native: Kubernetes, Docker, Pub/Sub, Cloud Run

PostgreSQL, MySQL, MS SQL - Advanced

JavaScript (React, Angular, jQuery) & TypeScript

CI/CD, Datadog Observability, GitOps

Cloud Migrations (AWS to Azure)

## WORK EXPERIENCE

Falabella (FTC) Dec 2024 - Feb 2026

### Senior Backend Engineer

- Remote
- Built and operated critical microservices using Node.js, Go, and Java on GCP (Pub/Sub, Cloud Run, Kubernetes) supporting operations relevant to retail and e-commerce sectors.
  - Designed and maintained high-throughput message processing with retries, idempotency keys, exponential backoff, and dead-letter handling for promotional events across Chile and Peru.
  - Implemented rate limiting and backpressure controls on Pub/Sub consumers to protect downstream services during traffic spikes.
  - Operated PostgreSQL at scale with connection pooling and read replicas.
  - Built observability by connecting Datadog (metrics, traces, logs) to services; on-call rotation for critical path services.

Sodimac / Retail Digital Corp Jun 2022 - Dec 2024

### Senior Software Engineer

- Remote
- Led personalization platform serving 5 LATAM countries; engineered A/B testing infrastructure with statistically rigorous experiment assignment and result tracking.
  - Built frontend libraries and modules in JavaScript/Dynamic Yield integrated with backend recommendation APIs.
  - Collaborated across engineering, product, and data science to deliver personalization features driving measurable revenue uplift.
  - Applied software engineering principles to improve customer experience in retail environments with high foot traffic and logistical complexity.

Transparentia SpA Oct 2020 - Jun 2022

### Full Stack Developer

- Remote
- Full-stack development with PHP (Yii2), MS SQL, and MySQL for critical organizational systems.
  - Executed full infrastructure migration from AWS to Azure (VMs, databases, networking).
  - Maintained legacy systems while delivering new features; zero-downtime migration for production workloads.
  - Implemented custom solutions and improvements in critical organizational systems for corporate clients.

CETIUC May 2012 - Jul 2020

### Development Engineer

- Santiago / Remote
- Sole engineer responsible for all platforms and services (PHP, MySQL, Symfony, jQuery, Highcharts, AWS/ECS).
  - Built and maintained voting platform for CIO/CPO clubs; managed infrastructure including domains, SVN, Apache servers.
  - Programmed and updated business benchmarks; built a PHP/MySQL voting platform for the CIO and CPO clubs.

IPG Panguipulli Campus Mar 2018 - Jul 2018

### Instructor

- Panguipulli, Chile
- Taught evening classes: Basic Computing, Computing I, and a Computer Applications Workshop.
  - Taught practical, applied computing skills to evening students.

INGELOG Jun 2011 - Nov 2011

### IT Technician

- Temuco, Chile
- Development and maintenance of systems and databases for Indigenous Development Projects in Temuco (bridge and road requests by indigenous communities).
  - Built and maintained systems for Indigenous Development Projects in the Araucanía region.

## PROJECTS

Pokengular Open Source

Angular experiment fusing two Pokémon names and generating AI images of hybrid creatures with Pollinations.ai (Flux model, BYOP flow). [pokengular.surge.sh](#)  
Angular, Pollinations.ai (Flux), BYOP flow

GameDeals - ITAD [Open Source](#)

Angular app (standalone components, signals, RxJS) listing temporarily 100%-discounted games via the IsThereAnyDeal API. [gamedeals-itad.surge.sh](#)  
Angular (standalone components, signals, RxJS), IsThereAnyDeal API

SetlistApp [Open Source](#)

Angular app to manage musical setlists: songs, pauses, drag-and-drop, duration lookup via iTunes Search API, optional Google Drive sync. [setlist-pab.surge.sh](#)  
Angular, iTunes Search API, Google Drive API

Pitch Trainer [Open Source](#)

Interactive ear-training web app (Web Audio API) to practice identifying musical notes from the first octave (C<sub>4</sub>-B<sub>4</sub>) with difficulty modes, keyboard interaction, and streak tracking. [pitch-trainer.surge.sh](#)  
Web Audio API, JavaScript / Web Standards

SKILLS

**Languages:** Spanish (Native), English (Professional C2; TOEIC 930, EF SET C2)  
**Programming Languages:** JavaScript, Go, Java, PHP, SQL (MySQL, MS SQL, PostgreSQL), HTML, CSS  
**Frontend:** React, Angular, jQuery, Dynamic Yield, Material UI, Bootstrap, Highcharts, Protovis  
**Backend & Cloud:** Node.js, Symfony, Yii2, GCP, AWS, Kubernetes, Docker, CI/CD, Datadog, Pub/Sub, Cloud Run  
**Tools:** Git, Linux/Apache Servers, SVN, Claude Code, GitHub Copilot, Gemini CLI
